

QUALITY POLICY STATEMENT

Hezky Medical and Reproductive Health Limited (**HMRH**) is committed to advancing medically assisted reproductive medicine and laboratory services through in vitro fertilisation (IVF) technologies, equipment supplies, and specialised consulting. We help clinics by setting up labs, providing supplies, and offering technical support, which allows them to provide safe, accurate, and high-quality care for patients while enhancing their ability to offer modern andrology and fertility services.

Our quality management system (QMS) is designed to meet all requirements stipulated in ISO 9001:2015, including compliance with all applicable ethical, statutory, and regulatory requirements. Our commitment lies in continuously improving our QMS to ensure the satisfaction of patients, healthcare providers, partners, and other stakeholders.

This quality policy provides the framework for setting and reviewing quality objectives and drives our pursuit of continuous improvement. It is communicated to all staff and partners, embedded in our daily operations, and periodically reviewed to ensure its suitability, adequacy, and effectiveness.
